

The Austin Company Preconstruction Services

The Austin Company is a full-service **design** and **construction** firm, serving industrial and commercial clients in North America, Europe and Asia.

Austin's comprehensive portfolio of in-house services includes planning, architectural design, engineering, design-build, and construction management, as well as location consulting and operations improvement consulting.

Founded in Cleveland, Ohio, in 1878, Austin's headquarters remain in **Cleveland**, with offices located throughout the **United States** and **Mexico**.

We deliver "**Results, not Excuses**"[®]

Since our founding, Austin has been guided by and committed to our core values.

These values include **safety, quality, honesty, integrity, respect, excellence and cooperation**.

Safety and quality are the foundation of our culture and this commitment lifts safety and quality from our Core Values and brings them to life in our daily activities.

Because of this dedication, Austin's safety record consistently ranks as one of the best in the industry.

If you share these values and promote the safety of your employees and the quality of your work, Austin would like to get to know you.

RESULTS, NOT EXCUSES®

Austin's **Top Notch Bidder Program** is designed to form partnerships with the most qualified subcontractors from every trade in regions where Austin is performing work.

1. Contact our Preconstruction Team
2. Complete our Pre-Qualification Form
3. Watch your email for invitations to bid

preconstruction@theaustin.com

Austin is committed to utilizing the most current technology and innovative practices on our projects, providing the best services and value for our clients.

Some of these tools include:

- Procore Construction Management
- Building Information Modeling (BIM)
- Lean Design and Construction
- BlueBook
- Building Connected

These tools and practices enhance project collaboration and coordination, allowing Austin to deliver high-quality projects with reduced risk, better aligned expectations, and maximized efficiency.
